

213-M-TAPE

Product Application Information for

Aircraft Paint Stripping

Lamart's 213-M-TAPE is a 3 mil, dead soft aluminum foil coated with a chemically resistant acrylic pressure sensitive adhesive. The tape's durable construction makes it highly resistant to the components used in aircraft paint strippers.

Applications include:

- Protecting sensitive aircraft parts
- Forming solvent diversion channels
- Securing drapes
- Window masking

FEATURE

- *Dead soft aluminum tape
- *Excellent balance of properties
- *Superior solvent resistance

BENEFIT

- *Highly conformable; easily flattened or formed
- *Effective adhesion with clean removal
- *Solvent does not undermine the adhesive

PRODUCT CONSTRUCTION

Backing:	3 mil (0.076 mm) dead soft aluminum foil
Adhesive:	2 mil (0.051 mm) acrylic
Release liner:	Available for die cutting applications
Adhesion to steel:	Minimum of 50 oz./in. (0.56 gm/cm)
Breaking strength:	Minimum of 26 oz/in. (4.64 kg/cm)
Elongation @ break:	5%

Specifications:

- AMS-T-23397 (replaces Mil-T-23397B, Amend. 2, Type II)
- L-T-80B
- FAR 25.853
